

COLIN FRAKE BLOCKMAKER

Price list

All prices ex works

We manufacture a comprehensive range of blocks in shell length from 3" upwards.

We have listed overleaf the most commonly requested configurations, but other formats can be made to order.

Details of shell length, sheave, pin and rope size are listed against the appropriate block size, e.g. a 3" block will take between 8 and 10mm rope.

BUT PLEASE NOTE: rope size can vary depending on whether the rope is pre-stretched or otherwise, so remember to check what rope you propose to use before ordering.

In general:

- All blocks listed are made of ash with copper riveted pins
- Bronze frames and sheaves are finished in a high gloss varnish
- Axle pins are 3/16" stainless steel
- Sheaves can be either bronze or delrin, all bushed with oilite bushes
- Block frames are available in bronze only. Galvanised frames are not shown in the current price list as they are increasingly hard to obtain. We do have some sizes in stock, so please contact us with your requirements
- Teak shells are also available, prices on application.
